This paper shredder ensures data security in private areas or home offices. Its induction-hardened solid steel cutting rollers are impervious to staples and paper clips and guarantee long service life. Optimum design of cutting and drive components as well as the closed gear mechanism ensure low noise. An integrated rocker switch starts the device automatically and switches it off again after the paper feed ends. The turbo function rectifies paper jams and ensures smooth operation. High user safety is guaranteed by the folding safety element, which prevents unintentional intake and automatically switches off the paper shredder if pressure is applied. The level of the waste container is always visible through the inspection window, making timely emptying possible. To empty the container you can simply remove the housing top with the handle recess for easy lifting. In standby mode, the energy-saving management system ZES ensures zero power consumption. The high-quality materials and proven quality "Made in Germany" guarantee you security and long service life.
