

# VPL-FHZ55 WUXGA 3LCD laser projector

see things in a new light with the world's first WUXGA 3LCD laser projector

Feature

{e∕

In a world first, Sony teams a highly efficient laser light source with 3LCD BrightEra™ Technology. This unique combination delivers exceptionally bright, high contrast pictures with excellent colour accuracy and stability. Improved efficiency and significantly greater durability ensure reduced downtime and lower lifetime ownership costs.

### Unprecedented stamina, brightness and image quality

The VPL-FHZ55 is the world's first 'lamp-free' 3LCD laser projector. Ideal for quality-critical installation applications, it delivers bright, detailpacked WUXGA images with a resolution that's higher than Full HD. So your audience only sees big, beautiful pictures... not pixels.

6666

The environmentally friendly, mercury-free laser light source is teamed with 3LCD BrightEra<sup>™</sup> technology by Sony. You'll see the difference with superb image quality and class-leading 4000 lumens colour brightness, plus exceptional contrast and consistent colour stability.

This advanced, highly efficient laser light source typically offers 20,000 hours\* of operation with no downtime or replacement – far higher than traditional projection lamps. Virtually zero maintenance requirements and a range of energy-saving features reduce total lifetime ownership costs compared with conventional UHP projectors.

The VPL-FHZ55 fits smoothly into almost any environment, from academic institutions, corporate, medical and public sector organisations, to visitor attractions and retail spaces. Seamlessly blend images from multiple projectors to create super-sized displays, or even project true, accurate images onto curved surfaces. Install the projector at any angle – even on its side or upside down. With the VPL-FHZ55, there are no limits to your creative vision.

\* under the condition of Light Dimming function activated

# A new generation in 3LCD panel technology

Unique to Sony, 3LCD BrightEra™ technology is combined with the advanced laser light source, delivering improved efficiency, colour stability, brightness and contrast.

# 20,000 hours\* maintenance-free operation

The advanced laser light source offers a typical 20,000 hours operation without maintenance or replacement, reducing lifetime running costs compared with traditional projectors. Synchronised filter replacement cycles keep the projector in peak operating condition while cutting maintenance visits even further.

# Clear, bright, punchy presentations in any lighting conditions

Add more detail, impact and realism to presentations with high 4000 lumen colour brightness. Get your message across clearly, even when ambient light levels are high.

### Crisp, detail-packed WUXGA resolution images

See the finest detail in PC presentations, videos or multimedia signage with WUXGA (1920 x 1200) 16:10 resolution image.

#### Up to 8,000:1 contrast ratio

Bring new levels of impact and excitement to any presentation. Sparkling highlights look brighter and whiter, complemented by incredibly deep, rich blacks and lowlights.

#### Wide Lens Shift, Zoom and Throw Ratio

Generous zoom, throw and lens shift adjustments give more flexibility for positioning the projector where you need it: close to ceilings, near the screen or even horizontally offset.

### 360° free-angle installation capability

Enjoy supreme installation flexibility: position the projector freely at any angle, or its side or even upside down.

#### Create super-size displays with Edge Blending

Seamlessly join accurately colourmatched images from multiple projectors, simplifying creation of stunning super-size displays for retail, corporate and live event applications.

#### Project onto non-flat surfaces with Image Warping

Easily correct image geometry for natural-looking projections – even on curved, convex or concave surfaces. Corner and edge correction can be easily adjusted with the supplied remote and on-screen menu.

#### **Project Side by Side**

Project images from two inputs at the same time: it's ideal for applications like video conferencing and medical training where two images need to be seen simultaneously.

#### **DICOM GSDF Simulation mode**

Get a clear view of digital medical images for training and other non-diagnostic applications. NB: Conforms to GSDF (Grayscale Standard Display Function) medical standards for DICOM (Digital Imaging and Communications in Medicine).

### Save energy at the touch of a button

Just push the ECO MODE button on the projector or remote commander to instantly access a range of energy-saving settings.

#### **Auto Dimming**

Projector brightness is gradually reduced automatically if there's no input signal, or after a pre-set time – cutting power consumption and saving energy bills.

#### Auto Brightness

Laser output power adjusts automatically depending on picture content, saving energy when dark scenes are being projected.

#### **Power Saving Picture Mute**

Touch a button on the projector remote and the picture's muted instantly, cutting brightness by 95% and reducing power consumption. Another touch and the projector's instantly powered back up to resume your presentation.

### PrimeSupport

This projector comes supplied with a 5-year support pack when sold in the EU, Norway and Switzerland, which offers unique extra services and benefits:

- 5 year cover\*\*
- Free telephone helpdesk support in English, German, French, Italian and Spanish
- Collection and delivery anywhere in the EU, Norway and Switzerland

\*\* Subject to Hours on Optical Engine and laser light source will be applied

#### Ideal for

- Higher education
- Visitor attractions and museums
- Corporate presentation
- Retail alsplay
- Public sector
- Video conferencing
- Medical training

beautifully clear, bright, high contrast images with reduced lifetime ownership costs

Distributed by	Professional Solutions Europe is the leading supplier of AV/IT solutions to businesses across a wide variety of sectors including, Media and Broadcast, Video Security and Retail, Transport & Large Venue markets. It delivers products, systems and applications to enable the creation, manipulation and distribution of digital audio-visual content that add value to businesses and their customers. With over 25 years' experience in delivering innovative market-leading products, Professional Solutions Europe is ideally placed to deliver exceptional quality and value to its customers. Sony's Professional Services division, its systems integration arm, offers its customers access to the expertise and local knowledge of skilled professionals across Europe. Collaborating with a network of established technology partners, Professional Solutions Europe delivers end to end solutions that address the customer's needs, integrating software and systems to achieve each organisations' individual business goals.
